PROFESSIONAL SUMMARY

Dynamic Software Tester offering 4+ years of experience writing test scripts, debugging and implementing automation tests to help applications run smoothly. Collaborates with software team in continuous build and deployment process. Excels at learning new software tools and best practices in software quality assurance.

SKILLS

- Desktop Operating Systems : Windows Family
- Primary Skill : Manual testing & Automation testing
- Automation Tool : Selenium WebDriver
- Languages : Java and SQL
- Database : Oracle 11g
- Bug Tracking Tool : Jira, Azure

- Project Versioning Tool : GitHub
- Regression & Negative Testing
- UI & Compatibility Testing
- API Testing
- Bug Fixes
- Writing Test Scripts & Documentation

WORK HISTORY

QA Engineer-

Magicflare Software Services LLP-Pune - From 3/05/2023- Current
Neosoft Technologies– Mumbai -From 2/12/2019 to 02/05/2023

Manual & Automation Skill Set-

- Gathered data on integration issues and vulnerabilities, reported findings and recommended , improvements.

- Collaborated with QA team to test software quality through manual and automated testing.

- Experience in writing SQL Queries against database for data verification using SQL Server
- Operated under Agile and Scrum frameworks to complete releases and well-organized sprints.

- Having Knowledge of implicit, explicit and fluent wait in Selenium Webdriver.

- Good experience in automating Web Applications using Selenium Web Driver with TestNG Framework, OOPS concepts, Collection framework, Arrays and String Class in JAVA.

- Good understanding of Build Automation tool i.e. Maven for Data Driven Framework
- Evaluated function, performance and design compliance of every product against design standardsand customer needs.
- Tested functional and compatibility of new programs or updates in comparison to existing applications.

Project 1
Project Title : Raw Material Supply Chain
Domain : Supply Chain Management
Manual + API + Performance Testing

Objective-The purpose of the application is to closely work with and use ERP data and provide nearly real time information about the RAW material inventory to the various personal involved in the supply chain Such as Buyer, PPC (Production planning and Control Official, Storekeeper, QC Manager.

Roles & Responsibilities:
- Responsible for creating and managing test data to execute test cases
- Creation of business rules and strategies Testing to ensure software quality and compliance with specifications
- The project involves the manual execution of test cases to validate software functionality, usability, and quality Efficiently identifying and documenting software defects, and effectivelytracking their resolution throughout the project
- Participate in daily scrum meetings to provide testing progress updates and collaborate with theteam on testing efforts within the project

Project 2
Project Title : ETP Implementation
Domain : Ecommerce
Manual + Database testing

Objective-The objective of this modification is to capture the requirement for creation of multiple types of promotions and execution of the same in Store Front respectively.

Roles & Responsibilities:
- Responsible for creating and managing test data to execute test cases
- Creation of business rules and strategies Testing to ensure software quality and compliance withspecifications
- The project involves the manual execution of test cases to validate software functionality, usability, and quality Efficiently identifying and documenting software defects, and effectivelytracking their resolution throughout the project
- Participate in daily scrum meetings to provide testing progress updates and collaborate with theteam on testing efforts within the project.

Project 3
Project Name : Victory Brewing
Domain : Beverage
Automation + API

Roles & Responsibilities:
- Identify and report functionality bugs.
- Write all bugs in conformance to internal standards and project specific requirements
- Update all bug databases with accurate and complete information. Perform all tasks in strict compliance to Information security policy and quality standards
- Attending daily scrum meetings
- Validation of Expected output vs Actual output in respective database tables Using SQL
- Identify the regression test cases for Automation and Scripts updating using POM Classes and Test Classes
- Preparing daily status report, weekly status report etc.
- Arranging & chairing weekly team meetings.

EDUCATION

BE(Electrical): 2019

Savitribai Phule University, Pune

Distinction 7.7 CGPA
